Projects

ScanMyBill (SMB): GST Invoicing Platform for MSMEs | *Docker, Azure Cloud, GitHub* 🔗 [GitHub](#) | 📺 [Demo](#)

- **Built and deployed ScanMyBill (SMB)**, a **GST invoicing platform** for Indian MSMEs, using FastAPI, PostgreSQL, Azure OpenAI API, Docker and GitHub.
- **Tested invoice extraction with 100+ invoices** covering different layouts and formats.
- **Used AI to extract invoice information (in JSON format)** from PDFs, images, CSV files, and DOCX files, helping reduce manual data entry.
- **Added JWT authentication, Google OAuth2 and API rate limiting** to the backend.
- **Deployed** the application on **Azure Container Apps** and **setup GitHub Actions** for automated testing and deployment.
- **Engineered prompts for Azure OpenAI** to extract invoice data accurately and return consistent, structured JSON output through the API.
- **Used OpenAI Codex** as a **coding assistant** during development.
